Projects

- 🔗 **XTS**
  - Dynamic theming + **white-label** branding engine
  - Real-time market feeds via **multiple socket channels**
  - Buy/Sell engine, portfolio management, watchlist, holding/positions, and charting
  - Real-time order updates with streaming mechanisms
  - Encrypted local storage + secure session management
    Technologies : Flutter, .NET Middleware, Multiple Sockets ,MySQL, Third-parties services, Firebase, Clean Architecture, BLoC, Cubit

- 🔗 **BullForce**
  - KYC/AML onboarding with Aadhar/PAN/Bank verification
  - UPI/NetBanking/SIP/SWP workflows
  - Advanced scanners, suggestion systems, dynamic market insights
  - Real-time positions, watchlists, order book, and holdings
  - Market socket integrations supporting thousands of ticks/min
    Technologies : Flutter, .NET Middleware, MySQL, Third-parti services, Sockets, CI/CD pipelines, Clean Architecture, BLoC, Cubit, Payment Gateways

- 🔗 **Spark - IRIS**
  - Dynamic page rendering engine with conditional routing
  - Multi-platform secure login Admin + Client
  - Microsoft Auth + deep link implementation
  - Single-space UI/UX layout engine compatible with multiple device form factors
  - End-to-end security with code obfuscation and platform-specific hardening
  - **Technologies** : Flutter, Java-Script, React, Swift, Kotlin, Obfuscation, CI/CD,MVVM, GetX

- 🔗 **SBI PaisaGenie**
  - Dynamic common widgets with multiple properties
  - Single-space UI/UX layout engine compatible with multiple device form factors
  - Feature-first architecture for scalable and handle huge users at insurance domain.
  - **Technologies** : Flutter, Obfuscation, CI/CD,MVVM, GetX

🔗 Baby led weaning guide recipes

- Multi-language localization (DE, FR, EN, IT)
- Universal UI for iPhone + iPad
- WebKit rendering for WHO nutrition content
- In-App Purchases for premium content
- Offline storage using CoreData

Technologies : Effective Collection View Delegates, Localization, Auto-layout, In-app purchase, WebKit, Alamofire, and Coredata.

🔗 Agrimedia

This is an Award-winning app in agriculture sector of India 2019.

- News module with dynamic images, videos, deep links
- Multilingual support (Hindi, English, Gujarati)
- Q&A module enabling farmers to post and resolve issues
- Analytics pipeline for user interactions

Technologies : Swift, MVC, PHP, MySql

🔗 Knackit

- Reduced app size **50+ MB** by replacing FFmpeg with native background method channels.
- Implemented Wallet, Rewards, Coins, and Transactional modules.
- Added localization for **12 Indian languages**.
- Built reusable component library adopted across app teams.
- Subscription plans (iOS + Android)

Technologies : Flutter, Swift, Kotlin, Laravel, MongoDB, CI/CD pipelines, Payment Gateways

• 🔗 AlleyData

- Universal UI for iPhone + iPad
- Health & Fitness, Routine, inventory, Appointments
- Sync API response and storage using CoreData
- Secure with session with notifier
- **Technologies** : CI/CD pipelines, Collection View Delegates, Auto-layout, RxSwift, Alamofire, MVVM, and CoreData

• 🔗 Heey There

- Dynamic map annotations with Google Maps SDK
- Offline location tracking and periodic sync
- Google Places API check-in/out system
- Real-time chat with Socket.io
- Subscription plans (iOS + Android)
- **Technologies** : Flutter, JAVA, MySQL, Firebase, Payment Gateways

- 🔗 **Legacy Vault**
  - Dynamic map annotations with Google Maps SDK
  - Offline location tracking and periodic sync
  - Google Places API check-in/out system
  - Real-time chat with Socket.io
  - **Technologies** : Flutter, Swift, Kotlin, Java, MySql, Firebase, CI/CD pipelines, Payment Gateways

ACHIEVEMENTS

- Achieved **Best Performance Award** in 2015
- Delivered award-winning mobile application in **INDIAN AGRIBUSINESS EXCELLENCE AWARDS 2019**.
- Contributed to product that secured **1.5 million USD funding** at startup stage.
